Mechanical mounting

Before mounting the exit button, a hole or recess in the wall with diameter 59 mm must be provided. It is also necessary to provide supply of a power cableand attendant connections or use installation boxes with 60 mm axial distance between fixing screws.

Important!
Although this proximity button is IP68 waterproof and dustproof, outdoor installation should still be avoided if rainfall is possible in your area, creating a dense wall of rain in front of the face of the button, in order to avoid unintentional false positives.
To avoid inadvertent activation of the proximity button sensors during rainfall creating a dense rain wall, the proximity button must be installed in such a way that the dense rain wall during precipitation extends no closer and not less than 800 mm from the face of the proximity button.
